

By improving how people, materials and equipment are integrated, whether in a manufacturing, processing, services or office environment, **we can help your company become even better!**

Integrating people, materials and equipment... **to make companies better!**TM

QP3 ERGOSYSTEMS CAN HELP

- **Make sense of the ergonomics regulatory environment** and help identify and complete the steps required to achieve compliance
- **Conduct targeted workplace assessments** that identify challenges to workplace *productivity*, and *profitability* due to substandard design
- **Provide solutions** through a comprehensive effort and clear, easy to follow steps
- **Assist with new projects** to help design engineers optimize the integration of people, materials and equipment during the blueprint stage of a project
- **Provide customized ergonomic training** geared towards employees, supervisors, managers and engineers, including the full-length Effective Industrial Ergonomics course, which includes valuable course handouts.

Make your operations more successful. We have consultants with decades of successful experience in many disciplines, including our Principal **Tim Pottorff**, a Certified Industrial Ergonomist, who has been successfully helping clients for over 25-years. Our experts have worked worldwide and in nearly every kind of industry. QP3 consultants help companies get beyond the initial *“analysis paralysis”* that can often occur. To overcome this, we focus on *practical assessment* methodologies, effective *problem solving* techniques, and *clear steps* that result in *real solutions*.

“It is not possible to thank Tim enough for the positive impact he had on our firm. After carefully listening to the problems we were having, he was able to quickly identify underlying ergonomic issues. Issues with back pain by the end of the work day were greatly relieved. This led to noticeably increased productivity and happier employees who had less pain from work.”

– Christina M. Magerkurth, PE
President, Magerkurth Associates, Inc.

“Tim Pottorff is an Ergonomics Specialist that I worked with a few years ago at Pittsburgh Corning. He did some amazing work for us and I was very pleased with the results and his knowledge and understanding of ergonomics as it applies to manufacturing environments. I used his assessment reports as support for plant improvements and referenced them several times over the years.”

– Jim Waldo
Human Resources Manager
